WHERE HE IS SILENT

Issues that Mr. Bryan is Afraid to Discuss.

DARES NOT TOUCH UPON THEM.

The Chicago Plank Which Assalls the Supreme Court and the Federal Right to Protect Its Own Property-The Tariff Question Entirely Ignored - Dodging

The platform of the party which the Populists have this year well nigh swal-lowed-all but the offices-contains broad threats that ought to forewarn every law abiding citizen, and cause him to work unceasingly for the utter defeat of ev-ery candidate, from the highest to the

lowest, who gives it his support.

The supreme court at Washington is justly called the bulwark of our liberties. The very existence of the nation is made more secure by the character Is made more secure by the character and offices of this, our nighest tribunal, only men of undoubted integrity and thoroughly versed in the law and all its intricacies are appointed to sit in this august body. And in order that it may be free from political influence, a life tenure of office is given.

The Chicago piatform assalls this court. It plainly intimates that the party proposes, if elected, to make such threaten its integrity, by making it subject to partisan influence.

The supreme court must not be tampered with. Its powers must not be abridged. Its decision, being final, must be entirely free from political and other demoralizing influences and as near absolute justice as human minds can make it.

among law abiding citizens on this point. How, then, can such voters cast a ballot for men who stand squarely upon a platform that assails this court? How can they continue with such a party? There can be no difference of opinion

During the great Chicago riot of 1391 the rallway trains running in and out of that city were delayed for hours or prevented from running at all, by the law-less mob. Property of immense value was destroyed, the United States mails could not be forwarded, and public travel and inter-state commerce was suspended.

wel and inter-state commerce was suspended.

There is no telling what might have happened if President Cleveland had not promptly dispatched United States troops to the scene to resist the rioters and restore order. The President had full authority to do this, and the law and order classes sustained him. But the element that controlled the Chleago convention denounced it as "arbitrary interference" in a clause of the platform, of which the following is an extract:

"We denounce arbitrary interference by federal authorities in local affairs as a violation of the constitution of the United States, and a crime agrainst the free institutions; and we especially object to government by injunction as a new and highly dangerous form of oppression."

The protest to "government by in-

pression."

The protest to "government by injunction," was virtually followed by a
demand that the right of the federal
courts to interfere in cases like the Chicago riots be abolished.

The power and fear of the courts and The power and fear of the courts and of the strong arm of the government are all that prevent the enemies of society from wreaking their vengeance, yet the Demopopullsts seek to remove this precious safeguard of the people. Why is Bryan ellent on a matter of such supreme importance?

Can intelligent and law-abiding voters support such a candidate and the mongrei party that nominated him?

Bryan has always strongly opposed a

Bryan has always strongly opposed a bryan has always strongly opposed a protective tariff. He knows that his opponent, William McKinley, is an ardent advocate of that policy. He is also well aware that in case the Republicans are successful in the coming election they will again pass a protective tariff bill. Why, then, is Bryan silent on the subject?

Because he knows that the countr home industries. Democratic tarifftinkering is largely responsible for the
lack of confidence and hard times now
prevailing, and wholly responsible for
the failure of the present administration
to meet the expenses of the government
with bond issues. People now realize
that they want more open milie instead
of more money and open mints. So
Bryan dodges the tariff and devotes all
his time to his free coinage scheme for
reaching the white house.

Will all this dodging of more important

Will all this dodging of more important issues and great hue and cry for free colunge deceive the people? Abraham Lincoln truly said: "You can fool all the people part of the time; you can fool part of the people all the time; but you cannot fool all of the people all the time; CHARLES H. COE.

Vicar General, gave to the Disputch correspondent to-night, a statement expressing the views of the 'archbishop on the political situation. He said:

"I have made a careful study of the question, and have read all of Mr. Bryan's sliver arguments, but have not found a single point in favor of the free coinage of silver. I can see only social revolution following its adoption. It must be snowed under.

"It will not do to defeat Bryan by a close vote. That will only lay the issue over four years, during which business will suffer because of the uncertainty of the next campaign."

WHAT AN ACCIDENT

lad to Do with the Daily Life of a Wheel

There is something novel in reading incidents connected with the life of people we know. Even if these are of their being bound up with the life of a neighbor makes them interesting. If it is only a readable notice of another man's weep or sorrows, curlosity alone neighbor makes them interesting. If it is only a readable notice of another man's wees or sorrows, curlosity alone tempts us, when we know there are others on the list to wonder who comes the control of the control of the control of the control of Mrs. Caroline Ritz, who some four years ago made a misstep and was precipitated into the cellar. The immediate results of the accident were gotten over when it was noticed that across the loins there was always more or less pain. In speaking about it, Mrs. Riiz says: "I suffered terribly with my kidneys the last two years and nothing did me any good until I got a box of Donn's Kidney Pills at The Logan Drug Company. They fixed me up in a very short time and I have felt well since. The pain across my loins was of a sharp, darting nature. I could at times scarcely move about and could not rest at nights, I had frequent attacks of headache and dizziness and a heavy, dull, bearing down pain in the bladder. The secretions of the kidneys were frequent, yet scarty and I felt generally out of sorts. Silver certificates \$3% \$6.25% and \$4.83% \$64 82%. The stock market to-day displayed a substantial increase in activity and business was fairly well distributed. Agressive strength was noted and in one or two cases the, shorts were severely treated, notably in Burlington and Chicago Gas. For several days rumors have been current of a probable squeeze of shorts in both properties. At intervals the speculation was quite animated and the dealings embraced a number of the usually inactive shares. The upward course of prices was again engineered in the face of a stringent money market and again the chief molive power came from forecasts of a continuation of the present extraordinary grain movement and advances in the prices of creals. An additional bull factor was the reported engagement of over \$5,000,000 in gold from Europe together with reports of a car famine at the west.

Higher London quotations and moderate purchases for that account stimulated fractional advances at the opening with the greatest activity in Sugar and the grangers. Increasing strength ruled until mid-day, when a reactionary tendency developed on realizations. The speculation in the late dealings was stimulated by a revival of strength in the wheat market. The closing was at the best prices of the day.

Railroad bonds were strong and more active. The sales were \$1.24,000.

Government bonds made a further allegit gain on purchases of \$2.000.

Silver certificates were steady; the transactione aggregated \$6,000 at \$6.
